ILLINOIS BI-MONTHLY ECONOMIC DATA SUMMARY

HIGHLIGHTS

October — November, 1988

STATE

Illinois Gross State Product for 1987 was revised sharply upward to $226.4 billion, up 8.0 percent from the previous year. In constant dollars (1982=100), the GSP was $192.2 billion, which represents an annual increase of 4.6 percent. The second quarter of 1988 GSP was up 9.4 percent in current dollars and 3.8 percent in constant dollars at compound annual rates of growth. The percentage increase for the GSP has exceeded that of the GNP for the past two years.

Cash Receipts from Farm Marketings have increased 17.3 percent, in the first seven months, over a year ago. The June and July totals for Crops were both up over 50 percent from last year.

Total contracts for future construction in September were valued at $813 million, a 11.6 percent decline over September of the previous year. Additionally, year-to-date contract figures show the state total behind two percent and the U.S. lagging by three percent from 1987.

The average state labor force total for October was listed as 5,807,000 persons. Of these, 5,423,000 were employed and 382,000 (or 6.6%) are shown as unemployed. The October unemployment count has dropped 0.1 percent from a year ago.

Average hourly wages for production workers in September was $11.09 (with the national hourly wage being $10.27). This represents a 2.1 percent increase over the $10.86 figure from a year ago. Additionally, average weekly hours worked have remained over the 41 hour figure for two years, with September, 1988 registering 41.6 hours.

Value added by manufacturing production increased 5.4 percent in Illinois during 1986 (the latest available figure) and 3.7 percent nationally. In the same year, the state's manufacturing productivity expanded its lead over the U.S. total by $4.38 per manhour of work.

The all-urban consumer price index (CPI-U) for Chicago continued to remain moderate as of September, 1988 with a 4.2% annualized increase. Nationally, the increase was also 4.2 percent for the same month.

In August, preliminary Retail sales increased 5.1 percent in the state from a year ago, improved 2.9 percent in the Chicago metro area and grew by 2.4 percent in the city itself.

A monthly barometer of business activity, the Purchasing Manager's Survey for Chicago remained positive into 1988. In September, 64 out of 100 managers indicated business activity was expanding. Nationally, the comparable figure was 55.

SOURCE: Office of the Comptroller

NATIONAL

The unemployment rate edged down to 5.2 percent in October, equal to the fourteen year low reached in June. As measured by the survey of business establishments, employment increased 323 thousand with manufacturing employment rising 99 thousand, reversing two months of declines.

The factory workweek edged down one-tenth of an hour to 41.1 hours, but the decline may reflect Columbus day closings. The average hourly earnings index jumped 0.8 percent--the largest monthly advance since May 1982--and rose 3.8 percent over the past 12 months.

The purchasing managers composite index jumped two points in October, more than offsetting the September drop. Production and employment rose sharply, but new orders, vendor performance, and inventories were little changed. Price increases were less widespread than in previous months and export orders weakened slightly, remaining below the average of the first half of 1988.

Producer price increases slowed with many food and energy prices declining. The indices for finished and intermediate goods were unchanged, and crude materials prices edged down 0.1 percent.

Regional growth in nonfarm income, 1987:II - 1988:II:

In New England and the Mideast, large increases in payrolls in construction and private service-type industries boosted nonfarm personal income growth. The Mideast region also benefited from strength in durables and nondurables manufacturing. In the Far West region, large payroll increases in nondurables manufacturing and construction boosted nonfarm income growth.

In the Great Lakes region, in addition to strong growth in durables manufacturing and construction, payrolls in nondurables manufacturing and private service-type industries grew at rates above the national average.

In the Southeast, growth in nonfarm personal income was somewhat below the national average; weak growth in nonfarm income -- especially private service-type payrolls -- in Georgia and in most interior Southeast states more than offset strong growth in the Atlantic Coast states of Florida, North Carolina, Virginia, and South Carolina.

In the Plains region, the weak farm economy adversely affected payrolls in nonfarm industries, including construction and durables manufacturing.

In the Southwest and Rocky Mountain regions, continued weakness in oil prices adversely affected mining and related construction and private service-type industries.

ILLINOIS BI-MONTHLY ECONOMIC DATA SUMMARY
December, 1988 -- January, 1989

HIGHLIGHTS

STATE

Illinois Gross State Product has exceeded the U.S. Gross National Product in ten out of the last eleven reported quarters.

Cash Receipts from Farm Marketings have increased 15.7 percent, in the first nine months, over a year ago. The September total for Crops was up 15.1 percent from last year, reflecting the increased prices of existing supplies due to the drought.

Total contracts for future construction in November were valued at $668 million, a 1 percent increase over October of the previous year. Additionally, year-to-date contract figures show the state total down 4 percent and the U.S. lagging by 2 percent from 1987 record levels.

The average state labor force for 1988 was 5,803,000 persons (a new record high). Of these, 5,408,000 were employed (also a record) and 395,000 (or 6.8%) were unemployed. The total labor force has grown by 49,000 in 1988. 78,000 more workers were employed last year resulting in a 0.6 percent decrease in the annual unemployment rate.

All major Metropolitan Statistical Areas (MSA's) in the state have shown a pattern of declining unemployment rates during the past five years. Among the nine largest, Decatur recorded the highest rate in November with 8.8 percent, while Champaign-Urbana posted the lowest at 4.6 percent.

Average hourly wages for production workers in November was $11.07. This represents a 1.8 percent increase over the $10.87 figure from a year ago. Additionally, average weekly hours worked have remained over the 41 hour figure for over two years, with November, 1988 registering 41.5 hours.

The all-urban consumer price index (CPI-U) for Chicago increased in December, 1988 at a 4.8 percent annualized rate. Nationally, the monthly increase was 4.4 percent.

In October, preliminary Retail sales increased 3.2 percent in the state from a year ago, improved 1.4 percent in the Chicago meto area and grew by 4.4 percent in the city itself. Sales figures for Chicago have turned positive in August, September, and October, after declining seven months in succession.

A monthly barometer of business activity, the Purchasing Manager's Survey for Chicago continued to remain positive well into 1988. In November, 57 out of 100 managers indicated business activity was expanding. Nationally, the comparable figure was 61.

NATIONAL

The overall unemployment rate held at a 14-year low of 5.3 percent in December.

Nonfarm payroll employment rose 279,000 in December, following a jump of 404,000 in November. Monthly gains averaged 337,000 during 1988.

The index of average hourly earnings rose 0.2 percent in December and 3.4 percent during 1988, compared with a 2.6-percent rise during 1987.

Domestic new car sales increased sharply in late December, resulting in an 8.4-million unit pace for the month--the strongest during 1988. New car sales in all of 1988, including imports, totaled 10.6 million units, up from 10.3 million in 1987.

1989 ILLINOIS ECONOMIC OUTLOOK

SUMMARY

The Illinois economy will continue to experience overall growth during 1989. Manufacturing will contribute to the overall expansion, with the machinery industry adding the most new manufacturing jobs. Growth in this industry will be fueled by strong exports and strenghtening domestic investment in equipment.

The drought will undoubtedly have an impact on Illinois' large food processing industry, but firms in these sectors will recover most of their increased costs by passing them on to consumers. Non-manufacturing will continue to provide by far the greater share of overall employment gains, with Illinois' trade industry remaining large. Overall employment growth will outpace labor force growth, as out-migration continues, through at a more moderate pace.

Strengthening employment opportunities and slightly slower out-migration will combine to ease unemployment. Industrial cost-cutting will continue to put pressure on wages. Illinois will continue to have a high level of per capita income, growth will be higher than it has been since the last recession.

The major risk to the economy as 1989 begins is the level of interest rates. Higher interest rates could adversely affect both business investment and export sales as well as the expected negative effects on retail sales and housing.

ILLINOIS BI-MONTHLY ECONOMIC DATA SUMMARY
February - March, 1989

HIGHLIGHTS

STATE

In 1988 the value of exports increased by 29.3 percent, while imports grew by 15.4 percent.

New business incorporations rose by 6.8 percent in Illinois last year. Nationally, there was a decline of 0.2 percent.

Cash receipts from farm marketings have increased 4.9 percent, in the first eleven months of 1988, over the same period in 1987. The year-to-date figure indicates that crop sales were up 11.3 percent from last year, reflecting the increased prices of existing supplies due to the drought, while livestock sales were down 4.5 percent.

Total contracts for future construction surged in December to bring the 1988 total nearly even with the 1987 record level. For the second consecutive year, construction contracts in Illinois have exceeded 10 billion dollars.

The average state labor force for February was 5,976,000 persons (a record high). Of these, 5,663,000 were employed (also a record) and 313,000 were unemployed. The February 5.2 percent unemployment rate is the lowest in 9 1/2 years. Since February of 1987, 294,000 more Illinoisans have been employed in a wide variety of industries, including: Business Services, Eating and Drinking Establishments, Manufacturing, Finance, Construction, Transportation, etc.

Among the major MSA's, in 1988 Champaign-Urbana-Rantoul continued to have the lowest unemployment rate with 4.2 percent. The highest was the St. Louis MSA (Illinois Portion) with a rate of 8.9 percent last year.

The all-urban consumer price index (CPI-U) for Chicago increased in February, at a 4.8 percent annualized rate. Nationally, the monthly increase was also 4.8 percent.

In 1988, retail sales increased 4.6 percent in the state from a year ago, improved 3.1 percent in the Chicago metro area, and declined by 1.3 percent in the city itself. Sales figures for Chicago rose in the last five months of 1988, after declining seven months in succession.

A monthly barometer of business activity, the Purchasing Manager's Survey for Chicago continued to remain positive for the 39th consecutive month. In January, 60 out of 100 managers indicated business activity was expanding. Nationally, the comparable figure was 53.

NATIONAL

The merchandise trade deficit narrowed in January to $9.5 billion from $11.0 billion in December. Both exports and imports declined. The deficit has shown little net change since the second quarter of 1988.

Manufacturing and trade sales increased one percent in January and stood 10.6 percent above their level in January 1988.

Manufacturing and trade inventories increased 0.7 percent in January, leaving the total business inventory-to-sales ratio unchanged during the month. The ratio declined slightly over the past twelve months.

The unemployment rate declined to 5.1 percent in February after staying within the 5.3 to 5.5 percent range for almost a year. The February rate was the lowest since 1974.

Nonfarm employment rose 289 thousand in February, compared with an average monthly increase of 298 thousand during the previous six months.

Retail sales fell 0.4 percent in February following a 0.7 percent gain in January. Sales increased six percent from their year-ago level.

Privately owned housing starts declined 11 percent in February to an annual rate of 1.5 million, similar to the rate during 1988 as a whole

Industrial production was unchanged in February, following 0.4 percent increases in each of the previous three months. Production has increased five percent since February 1988.

Capacity utilization declined 0.2 percentage points in February but remains over 2 1/2 percentage points above its long-term average.

The U.S. current-account deficit narrowed $0.7 billion dollars in the fourth quarter to $31.9 billion. During the quarter, the services account shifted from a small deficit to a surplus while the merchandise trade deficit widened.

For 1988 as a whole, the current account deficit narrowed $18.6 billion to $135.3 billion or slightly below its 1988 level. In the capital accounts, U.S. assets abroad increased $92 billion while foreign assets in the U.S. rose $211 billion.

The interest rate for 3-month Treasury bills stood at 8.69 percent at the Monday, March 13, auction--virtually unchanged from its level the past two weeks.

ILLINOIS BI-MONTHLY ECONOMIC DATA SUMMARY
April - May, 1989

HIGHLIGHTS

STATE

Per capita personal income in Illinois rose during 1988 to $17,611 from $16,417 the previous year, for a 7.3 percent annual increase. Nationally there was a 6.2 percent rise. Of the most populous states, Illinois' percentage rate of growth in per capita personal income last year exceeded all other states.

New business incorporations rose by 4.1 percent during the first quarter of this year. Nationally, there was an increase of 1.9 percent. On an annual basis, Illinois has surpassed the U.S. percentage rate of new business incorporations for the last two years.

Cash receipts from farm marketings increased 3.4 percent in 1988 over the previous year. Revised annual figures indicate that crop sales were up 7.7 percent from 1987 reflecting the increased prices of existing supplies due to the drought, while livestock sales were down 4.0 percent.

First quarter contracts for future construction were up seven percent over the same period in 1988. Nationally there was a three percent decline during this quarter. Most of the increase can be attributed to a surge in nonbuilding construction such as roads and highways, communication systems, etc.

The average state labor force for April was 5,960,000 persons, which is the third highest on record. Of these, 5,640,000 were employed (also the third highest) and 320,000 were unemployed. As a result of these improvements, the states' April unemployment rate declined to 5.4 percent. Since April, 1988, 313,000 more Illinoisans have found work, which is our second highest total for a twelve month period.

Among the major MSA's, in March, Champaign-Urbana-Rantoul continued to have the lowest unemployment rate with 4.4 percent. The highest was the Decatur MSA with a rate of 7.8 percent for the month.

The all-urban consumer price index (CPI-U) for Chicago increased in April (primarily due to higher gasoline prices) at a 5.6 percent annualized rate. Nationally, the monthly increase was 5.1 percent.

STATE (cont'd)

Revised 1988, retail sales figures indicate that there was an increase of 5.7 percent in the state from a year ago, 4.5 percent growth in the Chicago metro area, and a rise of 0.1 percent in the city itself. Nationally, retail sales increased by 7.8 percent in 1988.

A monthly barometer of business activity, the Purchasing Manager's Survey for Chicago continued to remain positive for the 41st consecutive month. In March, 58 out of 100 managers indicated business activity was expanding. Nationally, the comparable figure was 50.

NATIONAL

The merchandise trade deficit fell $1.0 billion in March to $8.9 billion. Exports rose 7.4 percent, reaching a record level, while imports increased 3.0 percent. The trade deficit declined from $30.4 billion in the fourth quarter to $27.4 billion in the first quarter of 1989. The value of the dollar rose sharply following the release of the trade report, and has increased about eight percent so far this year.

The Consumer Price Index rose 0.7 percent in April, following an average monthly gain of 0.5 percent during the first quarter. Much of April's increase came from a steep rise in gasoline prices. Excluding energy, the CPI edged up 0.2 percent.

The Producer Price Index for finished goods rose 0.4 percent in April, the same as in March, but well below the one-percent gains in January and February. A large increase in energy prices in April was offset by a decline in food prices. Excluding food and energy, finished goods' prices edged down 0.1 percent.

Housing starts fell 2.7 percent in April to their lowest level since the end of the 1982 recession.

Industrial Production rose 0.4 percent in April after no change in March and a decline of 0.3 percent in February. April's increase reflected a recovery in output of consumer goods, a pickup in output of materials, and continued strength in business equipment. Production of construction supplies declined.

The capacity utilization rate edged up 0.2 percentage point in April to 83.9 percent, a little over two points above its 1967-88 average.

Domestic new car sales slipped to an annual rate of 7.4 million units during the first ten days of May from a 7.5-million pace in April, but were above the first quarter's rate of 6.9 million.

Short-term interest rates continued to ease. At Monday's auction, the discount rate on three-month Treasury bills fell 20 basis points to 8.21 percent. The recent peak was 9.10 percent on March 27. Long-term rates have declined as well but less than short-term rates.

Business sales changed little in March, but were 7 percent above their year-ago level. Inventories rose 0.3 percent in March and stood 7.7 percent above their year-ago level. The stock to sales ratio edged up to 1.51 from 1.50 in February.

ILLINOIS BI-MONTHLY ECONOMIC DATA SUMMARY
June - July, 1989

HIGHLIGHTS

STATE

The Gross State Product (GSP) in Illinois rose during 1988 to an estimated $241.4 billion from $224.3 billion the previous year, for a 7.6 percent annual increase. Nationally there was a 7.5 percent rise in the Gross National Product (GNP) last year. Illinois' percentage rate of growth in GSP has surpassed the U.S. GNP for three consecutive years and in four of the last five years.

New business incorporations are up 4.6 percent in the first six months of this year over the first half of 1988. Through June, 15,236 new business incorporations had been filed in Illinois compared to 14,563 in the first six months of last year. Domestic business incorporations have progressively increased over the past three years, particularly in the first half of each year.

Through May, contracts for future construction were up 6.6 percent over the same period in 1988. Nationally there was a 0.7 percent decline. Most of the increase can be attributed to a surge in nonbuilding construction which has increaed 34.8 percent during this period.

The average state labor force for June was 5,934,000 persons, which is the fourth highest month on record. Of these, 5,609,000 were employed (also the fourth highest) and 325,000 were unemployed. As a result of these improvements, the states' April unemployment rate declined to 5.5 percent. Since June, 1988, 289,000 more Illinoisans have found work, which is our fourth highest total for a twelve month period.

Among the major MSA's, in May, Champaign-Urbana-Rantoul continued to have the lowest unemployment rate with 3.8 percent. The highest was the Decatur MSA with a rate of 7.1 percent for the month, followed closely by the St. Louis (Illinois portion) MSA at 7.0 percent.

The all-urban consumer price index (CPI-U) for Chicago increased in June at a 5.7 percent annualized rate. Nationally, the monthly increase was 5.2 percent.

A monthly barometer of business activity, the Purchasing Manager's Survey for Chicago continued to remain positive for the 43rd consecutive month. In May, 52 out of 100 managers indicated business activity was expanding. Nationally, the comparable figure was 50.

NATIONAL

The producer price index for finished goods rose 0.9 percent in May, a pickup from the 0.4 percent increase in March and April. The acceleration reflected rebounds in the prices of cars and fresh vegetables following declines in April. Energy prices still increased at a strong pace, though less rapidly than in the previous month. Monthly increases in nonfood, nonenergy prices at all stages of production have moderated from the large advances late last year and early this year.

The civilian unemployment rate edged down to 5.2 percent in May. Employment, as measured by the survey of households, rose a modest 91 thousand in May, well below the average of 237 thousand per month for all of 1989. The employment to population ratio held at 63.3 percent, its postwar high. Construction and manufacturing payrolls declined and gains in private service producing sectors slackened.

U.S. businesses plan to increase their spending for plant and equipment a solid 9.9 percent in 1989--6.5 percent after adjustment for price changes. Businesses raised their planned spending slightly since the previous survey. The Census Bureau estimates that capital goods prices will increase 3.1 percent during 1989, in contrast to less than 0.5 percent in 1987 and 1988.

Source of national data: U.S. Department of Commerce.

WHARTON ECONOMETRIC FORECASTING - JULY U.S. SUMMARY

U.S. production continues to slow, despite improving net trade, as a result of weakening demand for consumer goods and housing. Nevertheless, core inflation shows little sign of abating since tight labor markets are producing a gradual, but persistent, rise in wage inflation. In short, we have entered a period of stagflation.

The period ahead depends on the outcome of a number of highly uncertain developments: (1) the extent of the current slowdown and when and by how much growth will rebound; (2) whether inflation will ease in the next few months and whether it will rise again when growth recovers; (3) how much and how quickly the dollar will fall during the second half of this year; and (4) how the Fed will react to these developments.

ILLINOIS BI-MONTHLY ECONOMIC DATA SUMMARY
August - September, 1989

HIGHLIGHTS

STATE

The available balance in the Illinois General Funds account reached an all-time high of $783 million on July 31, 1989. The previous record was $680 million, set at the end of May, 1985. This balance represents an increase of $518 million from a year ago.

The Illinois crop production index, as of August 1, 1989, is 107.5% of the 1977 base, up 63% from the 1988 final crop production index. Compared with 1988, production of major crops this year in Illinois indicate corn for grain to be up 89%, soybeans up 45%, wheat up 57%, sorghum up 87%, oats up 74%, while hay production is down 14%. Apple production is expected to be up 9% from 1988, while peach production is down 30%.

The Illinois Composite Travel Index rose to 146 in May, 1989, an increase of 5 percent from May, 1988.

Through July, contracts for future construction were up 9.3 percent over the corresponding period in 1988. Nationally there was a 1.3 percent decline over the same seven months. Most of the increase in Illinois can be attributed to a surge in nonbuilding construction which has risen 29.7 percent during this period. In the other categories, nonresidential construction rose 10.9 percent, while residential construction is slightly ahead of last year, with a 0.9 percent increase.

The average state labor force for August was 5,889,000 persons, which is the sixth highest monthly total on record. Of these, 5,540,000 were employed (also the sixth highest) and 349,000 were unemployed. As a result of these improvements, the states' August unemployment rate stood at 5.9 percent, a full percentage point below a year ago. Since August, 1988, 115,000 more Illinoisans have found work.

Among the major MSA's, in July, Champaign-Urbana-Rantoul continued to have the lowest unemployment rate with 3.4 percent. The Springfield MSA was the second lowest at 3.9 percent. The highest was the Rockford MSA with a rate of 7.2 percent for the month, followed by the Decatur MSA at 6.6 percent.

The all-urban consumer price index (CPI-U) for Chicago increased in July at a 5.5 percent annualized rate. Nationally, the monthly increase was 5.0 percent.

A monthly barometer of business activity, the Purchasing Manager's Survey for Chicago turned down after 44 consecutive positive months. In July, only 47 out of 100 managers indicated business activity was expanding. Nationally, the comparable figure was 46.

NATIONAL

- Real GNP growth in the second quarter was revised upward from 1.7% to 2.7%. Three quarters of the revision was due to stronger growth in consumer spending, which rose 2.2% instead of the original estimate of 1.1%.

- Both personal income and personal consumption expenditures gained a strong 0.7% in July. Some of the strength in consumer spending has come from auto sales, which have benefitted from incentives, expected future price increases, and good news on the economy. Consumer durables in general have benefitted from sustained high levels of consumer confidence. Other categories of consumer spending, notably nondurables, are also showing some strength. The most positive development on the consumer side was that strong spending did not occur at the expense of the saving rate, which stayed at 5.7% in July.

- In response to lower interest rates, both housing starts and new home sales rose in July. Sales were at their highest levels since December 1986.

- The merchandise trade deficit fell in July to $8.2 billion, a four and a half year low, thanks to moderate export growth and a sharp drop in imports.

- The unemployment rate was unchanged at 5.2% and job growth, adjusted for the impact of strikes, was a sizable 218,000 in August.

- News from the manufacturing sector remained mixed, however. While industrial production rose modestly, both new orders and unfilled orders fell, pointing toward future weakness.

- The PPI for July fell 0.4% and the CPI rose 0.2%. Without food and fuel, the PPI declined only 0.2% and the CPI rose 0.4%.
